

Pupil Premium Spending 2018/19

For this academic year we will receive approx. £45,000 in Pupil Premium Funding from the government. This extra funding allows LHS to help students overcome any barriers to educational achievement such as poor attendance, disability, emotional upset, lower than expected literacy and numeracy skills, lower than expected prior achievement, finding a suitable course and lack of aspiration.

We will spend the PP funding on:

- Emotional and motivational support – in the Student Support Centre or in classes
- Team building activities – St David's Residential
- Literacy and numeracy support – supervised by Special Needs Coordinator and Heads of English and Head of Maths
- Learning Mentors – a six week programme for each student
- Reduced the class sizes throughout the years so that PP students benefit from more attention by their subject teacher.

The impact will be measured by:

- Number of students using SSC for academic and emotional support and how quickly they return to class
- Number of PP students making expected progress or better in a range of subjects including Maths and English
- Career progression post 16
- Take up among PP students of extra-curricular activities
- Attendance
- Results and progress made at each Data Week culminating in GCSE results

Pupil Premium Strategy Review

The date of the next Pupil Premium Strategy Review will be September 2019

Pupil Premium Spending 2017-2018
