

Rapid Reading

Thousands of schools use Rapid to help their struggling and disadvantaged students and those with SEN catch up in reading. An independent study by the National Foundation for Educational Research (NFER) has identified that students using Rapid Reading make more than twice the normal rate of progress in reading.

Rapid Reading is a fantastic collection of finely-levelled fiction and non-fiction books, covering a variety of topics and themes that students will love. Taking part in Rapid Reader will increase students' confidence in reading and encourages success.

Rapid Reading is ideal for students who need to catch up and close the reading gap. It is also ideal for students who need a continued boost after COVID 19 as well as those with longer-term needs.
